

The Aberdeen (Miss.) *Examiner* announces the death of that town, on the 18th inst., of the veteran statesman, jurist and soldier, Gen. Samuel James Gholson, at the advanced age of seventy-six.

Two letters which we publish this morning from our country correspondents are among the best features of an issue of the *Appraiser* that comes to its readers laden with an interesting variety of news, of short stories, sketches and incidents of the day.

The tragedian Keene will appear at the Theater to-morrow night and hold the stage during the week. A popular favorite, a man of undoubted ability and growing talent, a studious, painstaking, thoughtful and reasonably ambitious actor, he cannot fail to draw full houses every night.

Tux leading newspapers of the South and the leading public men continue to discuss the *Appraiser's* suggestion, induced by the liberal and entertaining New York *Herald*, that a Southern statesman be nominated in 1884 by the Democratic National Convention for Vice-President. It is surprising how the idea takes with the masses, and with unbiased thinking men.

By to-morrow the race track will be in good condition if the weather is favorable, and the attendance at the first day's race promises to be large. The stables already on the ground, lists of the horses to be entered for the races, and the country are to be entered for the liberal purses offered by the Memphis Jockey Club.

After the first flush of the excitement occasioned by the earthquake in Sumner, it was found that the number killed by the dreadful and unlooked-for calamity is 4000, and that the value of property destroyed will reach away up in the millions of dollars. The Port has issued an appeal to the people to assist the sufferers, stating that 20,000 of the survivors of the disaster have been rendered homeless.

The erection of the Cotton Exchange building on Second street will create a revolution in the architecture of Memphis. The front elevation of the proposed structure presents a handsome and dignified appearance, alike worthy the art and creditable to the committee of merchants who adopted it. It will be an ornament to our city—the palatial home of a body of men whose policy has passed into a proverb.

The Mozart Society, in its new hall, is now ready for a season that, it is promised, will be an improvement on that of last year, and in some respects a new era to the public, notwithstanding the recent losses of the society by fire. The close competition of the new hall, which was well organized, will prove an incentive to closer study and a higher price in an art that demands work, and more of it every day.

Work on the Memphis and Holly Springs road has been suspended for several months, on account of the death of Col. J. H. Hamilton, contractor. Thirty miles of road had been completed and about twenty miles of the road had been graded. The Memphis and Holly Springs road, the president, and the Water Valley *Express* says: "The case will go to trial early in November. Efforts are being made to compromise, but it is doubtful if it will be possible to complete the road at once."

The *Los Angeles Dispatch* by its exposure of the double dealing of Gov. Crockett and the police commissioners of St. Louis, deserves, as it has received, the thanks of the people and the indorsement of the State press with few exceptions. What the people of all the States want nowadays is honest and intelligent officers, and those who are found to be dishonest or incapable should not be elected because of their politics, or defended because of their supposed political importance. That sort of thing is played out, and the *Los Angeles* has proven.

The completion of the Kansas City railroad was testified to yesterday by the arrival of a train of fifty-six cars loaded with grain, wheat and whisky. This event is significant of the future of Memphis, and we hope that the city will be able to handle the commerce of the West, a harbinger of fortune and a promise of the "good time" for which this city has labored so earnestly in the face of unnumbered calamities. The railroad from Memphis to Kansas City is a fixed fact.

In view of the threatened agitation for the correction of the general public opinion to all civil rights legislation by a further constitutional amendment, the *Paul Pioneer Press* (Republican authority) says: "It is doubtful if the agitation will have strength and vitality enough to accomplish its purpose, and we believe it will be a change in this. It is doubtful, too, if the direct pressure of legislative enactment will be so effective for the cure of the injustice as the gradual growth of a more rational and just public sentiment. Legislative compulsion finds but a precarious hold upon the slippery and elusive body of a popular prejudice."

The Fort Smith Independent *True Democrat* insists that "the defaulters in the Democratic party of Kentucky are not honest, and the party cannot afford to pose them before the country as martyrs. They have fallen by their own hands, the Democratic party cannot be responsible for their deeds, and they must take their place in the political history of the State alongside Clayton, Hatley, Tankersley and others of reconstruction fame. When the Democratic party acts upon this principle, as we believe it will—recovers public opinion and panishes the thieves—it will be unnecessary for some one to remind us that it is time to 'call a halt.' And, on contemporary might have added, it will be impossible to hold the Democratic party responsible for the sins it has properly punished."

The next meeting of the Southern Historical Society is to be held in Nashville, Tenn., on Saturday, November 18th, and the association will draw up a financial scheme which will be the basis of future action. The association desires to establish a permanent home in Nashville, and to have a large hall for the reception of the Southern people in New York, where the immigrant will be met by the agent of the association and cared for, and then assigned to a suitable colony in the interior. In this way the Southern States can become independent of the Northern people and can control the immigration. As the case now stands every influence is brought to bear to persuade the foreigner to locate in the North and West, and even if he is sold such narratives as to almost force him to change his purpose.

## REV. HENRY POTTER

Consecrated as Assistant Bishop of New York with Imposing Ceremonies, Forty Bishops and

Six Hundred Clergymen Participating—Proceedings of the General Convention at Philadelphia.

PHILADELPHIA, October 20.—The Protestant Episcopal General Convention assembled here to-day for the opening of its annual session. The convention is composed of representatives of the Episcopal Church in the United States, and is the largest assembly of the kind in the world. The convention is held at the University City Hotel, and is presided over by the Rev. Henry Potter, Assistant Bishop of New York.

The report of the Joint Commission on Church Property, delivered to the convention, was a most interesting and important document. It contained a full and complete report of the commission's work, and was received with great interest by the convention. The commission had been organized by the General Convention in 1881, and had since that time been engaged in a study of the question of church property.

## ANOTHER SQUEEZE.

The "Shorts" Caught on Northern Pacific Preferred and Squeezed for It They are Worth.

Unparalleled Excitement on the Floor of the Exchange—A Brilliant and During Scheme.

ST. PAUL, October 20.—This was another lively day at the Stock Exchange. Speculative interest chiefly centered in Northern Pacific preferred, which closed at 100. The stock went down from 90 to 50 in the morning, and then rose to 100. The market was very active, and the volume of business was large.
